

BOMBARDIER

Global 8000

Distance, with perspective.

Four distinct cabin zones offer space for meetings, dining and private rest. An aircraft for owners who value long-distance capability and a thoughtfully separated living environment.

8,000 nm

MODEL MAXIMUM RANGE

Up to 19

MODEL PASSENGERS

On request

ASKING PRICE

MODEL REFERENCE EDITION. Online photographs are not verified photographs of the specific aircraft offered. Request the individual year, serial number, hours, equipment, photographs and maintenance records before making a purchase decision.

THE CABIN PERSPECTIVE

Space, considered.

The four-zone design allows different activities to occupy different parts of the cabin. Review the actual layout for work, dining, relaxation and rest; published model capability does not establish which options are installed on a particular aircraft.

Cabin arrangement	Four principal zones
Model passenger capacity	Up to 19
Published cabin altitude	2,691 ft at 41,000 ft
Seating layout	Individual floorplan required
Sleeping provision	Configuration dependent
Connectivity and equipment	Installed specification required

Dimensions follow manufacturer definitions and may include different areas or measurement conventions. Confirm the completed aircraft floorplan, measured clearances and installed equipment; depicted options are not a promise of inclusion.

PERFORMANCE & SYSTEMS

The detail behind the decision.

Published model data. Use these figures to inform a conversation, not to dispatch a flight or establish the condition of an individual aircraft.

Published maximum range	8,000 nautical miles
Model passenger capacity	Up to 19
Published top speed	Mach 0.95
Engine family	GE Passport
Cabin planning	Four-zone model architecture
Range and seating	Separate model maxima
Individual performance file	Required before purchase

How to read these figures

Manufacturer model figures are not a guarantee for a particular flight. Range, payload and speed must be assessed together. Request a mission analysis for the exact aircraft and operating conditions.

Maximum passenger capacity and maximum range are separate measures and may not be achieved together. Always confirm the current aircraft flight manual, approved configuration and operating limitations with qualified specialists.

YOUR ACQUISITION FILE

Know the aircraft. Not just the model.

For a Global 8000 acquisition, confirm the precise delivered configuration, certification status and maintenance programme coverage. Do not substitute a Global 7500 or an earlier concept specification.

Before a purchase decision

Identity & title

Obtain the registration, manufacturer serial number, year, seller authority and independent title / lien checks.

Condition & maintenance

Review airframe hours and cycles, complete engine / APU records, maintenance due, damage / repair history and programme transfer terms.

Cabin & capability

Confirm the signed equipment list, floorplan, connectivity subscriptions, baggage provision and an aircraft-specific mission assessment.

Inspection & completion

Arrange independent technical and legal advice, pre-purchase inspection, agreement and escrow arrangements, insurance, registration and relevant import / export checks.
